

ENVIRONMENTAL POLICY

In order to operate in harmony with the surrounding environment, ensure sustainability, achieve our goals, implement business ideas, and comply with the requirements of the Environmental Management System according to LST EN ISO 14001:2005 standard, we undertake the following:

1. to maintain a clean environment on the premises and grounds of the company
2. to produce and supply quality products and provide quality services in order to sustain a clean environment
3. to observe the requirements of environmental protection and other regulatory documents
4. to control the use of hazardous waste and ensure that storage and handling are carried out safely and in compliance with environmental requirements
5. to handle production waste in the most environmentally and economically efficient way
6. to keep abreast of technological innovations and replace hazardous substances with less hazardous ones
7. to assess and control the environmental impact of the company's operations and expansion
8. to use both natural and energy resources economically and responsibly and to contribute to overall EU environmental policy by implementing provisions of sustainable development
9. to protect consumers and the environment against the possible adverse impact of hazardous substances and preparations
10. to ensure the provision of satisfactory sanitary facilities, work and rest conditions for employees, to erect work stations rationally and in compliance with the requirements, and to protect employee health
11. to develop the ecological awareness of employees
12. to encourage participation in public campaigns.

The company's management undertakes the following:

- to familiarise employees with this environmental policy, to provide conditions for observing these provisions at work, and monitor that these principles are complied with
- to ensure easy access of the public to environmental policy
- to monitor, analyse, and continuously enhance the Environmental Management System
- when selecting suppliers, to assess their environmental impact
- to inform clients and suppliers about the company's environmental policies.

Saulius Mudėnas
Director
